

Tanker Series

We have built our company on reliability, trust, customer service and superior quality since 1974...

T-250

The harder you look,
The better we look...

Danko has demonstrated our ability to fulfill the needs and wants of our customers with superior craftsmanship using innovative construction techniques and the finest materials available.

Danko custom designs and builds tankers with aluminum bodies in three tank styles to fit your specifications. Our tanker line includes sidemount, wetside and elliptical style polypropylene tanks. Each style has been individually designed using over 37 years of fire apparatus manufacturing experience.
